Seattle Woman Singled Out for Environmental Leadership *Honoree Receives National Audubon/Toyota TogetherGreen Fellowship*

New York, NY, November 19, 2009-A Seattle, Washington woman is the recipient of a national fellowship designed to advance the work of individuals with outstanding leadership potential to help shape a brighter environmental future.

Annie Morton is one of 40 individuals nationwide selected as a 2009 *TogetherGreen* Fellow. The *TogetherGreen* Fellowship offers specialized training in conservation planning and execution, the chance to work and share best practices with gifted conservation professionals, and assistance with project outreach and evaluation. Each Fellow receives \$10,000 towards a community-focused project to engage local residents in conserving land, water and energy, and contributing to greater environmental health.

For her fellowship, Morton will expand and enhance the Citizen Science program at the Seward Park Audubon Center. With her assistance, Seattle residents will be able to take part in a variety of projects, including native habitat restoration, urban coyote tracking, eagle DNA fingerprinting, water quality monitoring, plankton studies, seabird surveys, and bat population assessments. With help from its visitors, the Seward Park Environmental and Audubon Center hopes to learn enough about the surrounding urban habitats and ecosystems to protect them into the future.

“Annie is the kind of person who can make a real difference in the health of our environment and the quality of our future,” said Audubon President John Flicker. “Each of our *TogetherGreen* Fellows demonstrates exceptional environmental understanding and commitment, combined with tremendous potential to inspire and lead others. Together, they represent the talented and diverse leadership the environmental community will need to tackle the huge challenges and opportunities confronting us now and in the years to come.”

“By providing a network of support, this fellowship will allow me to engage our local community members in ecological and conservation science projects right here in their own urban ecosystems,” said Morton.

Morton has been the education director at the Seward Park Environmental and Audubon Center since 2007. Half of the *TogetherGreen* Fellows come from within Audubon’s far-reaching national network; half channel their environmental efforts through other organizations.

Morton received a Bachelor’s degree in Environmental Studies from the University of Tennessee. She has held previous educator positions at a number of organizations including

Keep Knoxville Beautiful in Knoxville, Tennessee, the Ohio River Foundation in Cincinnati, Ohio, and the 'Ahakhav Tribal Preserve in Parker, Arizona.

A distinguished advisory committee- composed of conservation professionals and experts in environmental education, communications, outreach, and conservation planning-selected the fellowship beneficiaries from a competitive pool of scores of highly qualified individuals. Qualified applicants must have at least six years of experience in conservation, environmental education, policy, or environmental issues, as demonstrated through current and past work experience, academic studies related to conservation, and/or volunteer work. Candidates must have a passion for conservation, the desire to learn and grow, and demonstrate a proven ability in reaching previously unengaged audiences.

"We must engage the best and brightest leaders representing the broadest and most diverse communities in this country to solve our ever more complex conservation challenges," said Diane Wood, President, National Environmental Education Foundation. "*TogetherGreen* is a creative program that uncovers such leaders, nurtures their talents, supports their dedication to conservation and holds them up to inspire others to follow."

A complete list of the 2009 *TogetherGreen* Fellows can be found at www.TogetherGreen.org/fellows.

About *TogetherGreen*

Audubon and Toyota launched the five-year *TogetherGreen* initiative in 2008 to build the promise of a greener, healthier future through innovation, leadership and volunteerism. To date, 80 environmental leaders-half from within Audubon and half from outside organizations-have received *TogetherGreen* Fellowships to protect land, water, and energy resources nationwide. For more information, visit www.togethergreen.org.

About Audubon

Now in its second century, Audubon connects people with birds, nature and the environment that supports us all. Our national network of community-based nature centers, chapters, scientific, education, and advocacy programs engages millions of people from all walks of life in conservation action to protect and restore the natural world. Visit Audubon online at www.audubon.org.

About Toyota

Toyota (NYSE: TM) established operations in the United States in 1957 and currently operates 10 manufacturing plants.
